

Robianto

Dot Art Collection

The Artist

Robianto's background was forged by his Spanish Father and Indonesian Mother. He started painting at 16 and, in his early 20's encouraged by his Australian wife his painting career started to blossom.

His paintings adorn some of the finest homes and offices in Europe as well as Australia and New Zealand. His clients now span the globe.

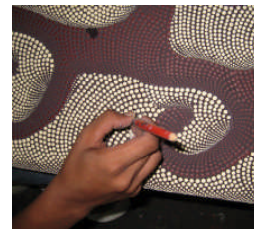

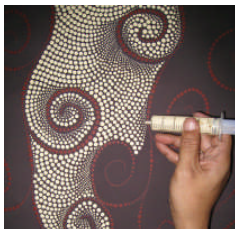

His technique of painting is achieved by a combination of different sized syringes and sable brushes. Each dot is carefully positioned and sized. There is no room for error in any of his creations.

His unique style of "Dot Painting" introduces a subtle texture to any room. His understated colour combinations combine with almost any type of decor be it traditional or contemporary.

Most of his paintings can be hung horizontally or vertically. Some are available in diptychs and triptychs.

Every Robianto painting is slightly different from the next although he does replicate some of his images in an effort to keep his prices affordable.

Robianto showing his unusual painting technique - each dot is a calculated exercise in balance, size and precision.

Some Robianto Classic Pieces and close ups showing his extraordinary attention to detail
