WARNING :

TOP BUNKS AND ELEVATED BEDS ARE DANGEROUS AND ARE NOT RECOMMENDED FOR CHILDREN UNDER THE AGE OF 9

Falls from elevated beds can be fatal and deaths have occurred where children have fallen from elevated beds. This is relevant for all ages. The risk is greater for younger children.

The risk of injury or death from a fall from an elevated bed compared to a non-elevated bed is :

10 x greater for 7-8 year olds

7 x greater for 9-10 year olds

3 x greater for 11-12 year olds

TO HELP PREVENT serious or fatal injuries from entrapment of falls :

- Use the correct size mattress as specified.
- It must be at least 6.25" (160mm) below upper edge of guardrails.
- Follow written instructions with this bed.
- Use guardrails on both sides of upper bunk.
- Prohibits horseplay on or under bed.
- Check the bunk bed periodically to ensure that the guardrail, access device and other components are maintained in the correct position and state of repair and that all connectors are tight.
- Prohibit more than one person on upper bunk.

WARNING: The upper bunk must be more than 2 m from any ceiling fan.
