Make sure the protrusion is stuck. Otherwise, the left side of the desk will not go Up/Down when you adjust the height.

Assembly Options

The side cabinet can be installed on the left or right side of the desk. Please select an option and proceed with assembly.

Option A | On The Left

Option B | On The Right

Option A | On The Left

IF THE LEFT SIDE DOESN'T GO UP/DOWN WHEN USING THE DESK, GO BACK TO STEP 6. MAKE SURE THE DRIVE ROD IS INSTALLED CORRECTLY.

IMPORTANT! You must Reset the desk prior to use:

Press and hold the "☑" button on the Handset until the desk reaches its lowest height. Release the "☑" button.

Press and hold the "☑" button again for more than 3 seconds until "r 5t" is displayed. Release the "☑" button.

Press and hold the "☑" button until the desk lowers a little bit more, slightly rises and stops. Release the "☑" button. The handset will then display the current height.

Your desk is now ready to use.

Option B | On The Right

IF THE LEFT SIDE DOESN'T GO UP/DOWN WHEN USING THE DESK, GO BACK TO STEP 6. MAKE SURE THE DRIVE ROD IS INSTALLED CORRECTLY.

IMPORTANT! You must Reset the desk prior to use:

Press and hold the "☑" button on the Handset until the desk reaches its lowest height. Release the "☑" button.

Press and hold the "☑" button again for more than 3 seconds until "r 5t" is displayed. Release the "☑" button.

Press and hold the "☑" button until the desk lowers a little bit more, slightly rises and stops. Release the "☑" button. The handset will then display the current height.

Your desk is now ready to use.

Digital Control Panel For Electric Height Adjustable Desk

User Guide

Lifting Function

Press the "" button, the desk will rise automatically and stop automatically when it rises to the highest point.

Press the "" button, the desk will descend and stop automatically when it descends to the lowest point.

Memory Mode

To store a certain height in the controller's memory, press the "**1**" button for more than three seconds. "**5-1**" will be displayed, indicating that the current height has been saved to the "**1**" button successfully. Repeat the process using buttons "**2**", "**3**".

Reset Mode

1. If the height of the desk is incorrect, press the "" until the desk moves to the fully lowered position. Press and hold the "" again for at least three seconds and release. "**5-5**" will be displayed.

2. If the system displays "**Err1**", press and hold the "" for more than three seconds and release. "**5-5**" will be displayed, then continue the reset operation.

Child Lock

TO LOCK: Press and hold the "" and the "" simultaneously for five seconds until the LED reads "**Loc**".

TO UNLOCK: Press and hold the "" and the "" simultaneously for five seconds until the LED switches from "**Loc**" to the height display.

Sedentary Reminder Operation

Each time the "" key is pressed, the digital display will increase by 0.5 hours (0.5h), up to 2 hours (2.0h).

After the display screen flickers for 4 seconds, the setting is successful.

The current time countdown starts, when the time is up, the buzzer will beep 5 times in a row, and then it will automatically exit the timer.

Collision Avoidance Settings

Press and hold the "**1**" and "**2**" buttons together for more than 20 seconds to enter the Collision Avoidance Settings Mode. Use the "" or "" buttons to adjust the sensitivity level. Once the sensitivity has been selected, press the "**1**" and "**2**" arrows again for more than 20 seconds to save the setting.

Collision Avoidance Sensitivity Levels: 0-9

0: Turn off collision avoidance.

1-9: Level 1 is the lowest sensitivity and level 9 is the highest.

ADVANCED SETTING

Press and hold the "1" button and the "2" button simultaneously for 20 seconds until the LED flashes. The menu contains 7 items as the table below.
